

***This breakthrough in oral delivery uses the NTRIX™ Delivery System.***

This "Next Generation" in GH polymer technology involves suspending HGH in a liquid medium so that it can be sprayed into the mouth. It is then directed into the bloodstream from the oral mucosa.

**Growth Hormone** is primarily released in pulses that take place during the beginning phases of sleep, then quickly converted in the liver to its powerful growth promoting metabolite: Insulin-Like Growth Factor Type 1 (IGF-1). It is IGF-1 that elicits most of the effects associated with the growth hormone and is measured in the blood to determine the level of growth hormone secretion.

**PYRADYNE'S** use of the **NTRIX™** system provides the body with micro-doses of growth hormone designed to gently mirror the pituitary's natural growth hormone secretions.

**PYRADYNE' ANTI-AGING** Daily Strength Formula contains real pharmaceutical grade naturally derived Growth Hormone and more than any other: 300 nanograms per spray or 2050 ng/ml.

**Recommended Daily Dose: 1800 ng at six sprays per day.**

For best results spray 3 squirts under the tongue upon awakening and 3 sprays upon retiring. This will closely mimic the bodies' natural secretion of HGH.

***Clinically, our products have shown significant benefits.*** A 200 person double-blind study showed the NTRIX™ Delivery System to be superior to anything else on the market.

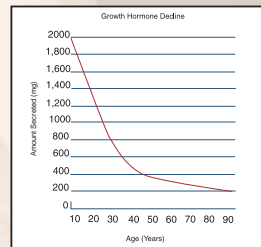

- Most noteworthy, an overall
- **8.5% decrease of blood cholesterol**
  - **15% increase in HDL**
  - **19.6% decrease in LDL**
  - **35% increase in testosterone in 2 weeks**
  - **15% increase in DHEA in 2 weeks**
  - **A steady increase of IGF-1 levels to 109 % over baseline after 6 months**

***New England Journal of Medicine*** published a study by Dr. Rudman of 26 men between the ages of 61 and 80. The men that were given HGH experienced the following:

- 8.8% increase in lean mass
- 14% decrease in body fat
- Increase in bone density
- Thicker and firmer skin

According to Rudman the subjects of the study reversed these parameters of aging by 10-20 years! American Academy of Anti-Aging Medicine's 5,000 members of doctors and scientists are united by the fundamental belief that "The aging process can be slowed...or even reversed".

**THE ULTIMATE ANTI-AGING THERAPY WHAT IS...HUMAN GROWTH HORMONE or HGH**

**AGING IS NOT INEVITABLE**

"The overall deterioration of the body that comes with aging is not inevitable."

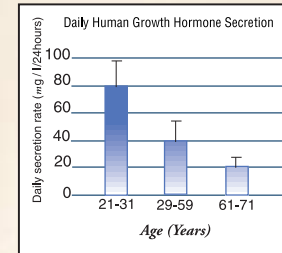

***Dr. Rudman The New England Journal of Medicine***

"What we now call aging appears to be due in large part to the drastic decline of the Human Growth Hormone in the body after adulthood".

A great deal of aging is due to the breakdown of proteins in THE CELL as well as DNA and RNA that provide the blueprint for making protein.

Growth Hormone may actually stop aging on the most fundamental level of the body's organization—THE CELL. SKIN, HAIR, BONE and MUSCLE are all made up of proteins and as proteins degrade, so do the things that make them up. The skin wrinkles, hair falls out, muscles shrink, bones lose their density. In the BRAIN the situation is worse because the primary brain cells, the neurons, cannot regenerate. As a result starting in middle age, our mental power decline. Reaction time slows, and memory develops gaps."

***Grace Wong, PHD Genetech Inc.***

Tens of thousands of studies worldwide have shown that HGH REPLACEMENT THERAPY is now thought to be one of the most important factors in staying healthy and enjoying an improved quality of life.

Until recently, growth hormone therapy has only been available in the form of injections that have been prohibitively expensive and difficult to use. The GH molecule is a large complex molecule with no other passage available that would keep the molecule intact for easy absorption.

It is a natural hormone secreted by the anterior pituitary gland and located at the base of the brain. In childhood it accounts for the growth of muscle, bones and vital body organs.

At age 21 the normal level of circulating HGH is about 10 milligrams per deciliter of blood, while at age 59, it is two milligrams per deciliter— a decrease of 80 percent!

The effect at the cellular level is that in our 20's we generate a new cell for each one that dies. By the time we reach our 50's, we only generate one new cell for every two that die. When we are in our 70's only one cell is replaced for every three or four!

**Human Growth Hormone**

- Increase Energy Level
- Lose Fat, Gain Muscle
- Increase Exercise Performance
- Increase Memory Retention
- Improve Vision
- Increase Immune Function
- Improve Cholesterol Profile
- Improve Skin Elasticity
- Remove Wrinkles
- Eliminate Cellulite
- Enhance Sexual Performance
- Lower Blood Pressure
- Increase Bone Mass
- Improve Quality of Sleep
- Re-growth of Heart, Liver, Spleen, Kidneys, and other organs that shrink with age.

**INTRODUCTORY OFFER**

***Try Pyradyne's Anti-Aging Daily Strength Formula for two months and receive a special gift***

Buy a two-month supply of Pyradyne's HGH. And receive a free one month supply of Dr. Bell's Full spectrum vitamins (\$32 retail value).

***Pyradyne's Anti-Aging*** Daily Strength formula 1oz. spray bottle - 180 servings.

- \$69 for a one-month supply
- \$138 for two-months supply – Receive Dr. Bell's Super Formulation of Pyradyne's Full Spectrum

For more information On Pyradyne's Anti-Aging Daily Strength Formula visit [www.pyradyne.com](http://www.pyradyne.com) Or call Pyradyne at 800-729-2603.
